

MOTORCYCLE CRASH BAR LIFT

ABSTRACT OF THE DISCLOSURE

5 A motorcycle crash bar lift for lifting a motorcycle using a rotating crash bar having a bottom side, a top side, a left side and a right side. A mounting collar is connected to the crash bar bottom side. A mating gear is connected to the mounting collar and is rotatably connectable to a conventional motorcycle frame. A worm gear is in meshing contact with the mating gear, for driving the mating gear to rotate the mounting collar to rotate the crash bar to lift a conventional motorcycle. The worm gear is rotatably connectable to the conventional motorcycle frame.
